Prvý polčas sme herne dominovali, hráči veľmi dobre kombinovali, v prípravnej zóne ihriska sme získavali všetky lopty a často sme sa pokúšali o zakončenie. Veľmi ma mrzí, že dvoma hrubými taktickými chybami (nesmie sa to stávať pri takomto vývoji zápasu) nás súper potrestal. Po zmene strán sme sa pokúšali niečo vymyslieť aj zmenou rozostavenia a striedaniami hráčov, efekt to však neprinieslo. Naopak, súper mohol zvýšiť svoje vedenie po rýchlych protiútokoch do otvorenej obrany (išli sme do rizika). S prvým polčasom som bol spokojný, pretože sme predvádzali futbal, na ktorý sa dalo pozerieť. Sklamali ma striedajúci hráči, ktorí nepriniesli požadovanú kvalitu. V takýchto zápasoch rozhodujú individuality a my sme dnes "strelca" nenašli. Myslím si však, že je na čom stavať do ďalších zápasov. Aj prehry nás musia posúvať vpred...</p> |            |                                                                                                        |          |                                                                                                                                                                               |                                                                                                          |     |          |                                                        |     |      |       |                                                                                                         |  |        |     |  |        |     |                                                                                                  |  |        |     |  |                                                                                                                                                                                                                                                                                                                             |  |      |  |  |      |     |         |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                               |  |  |         |  |  |       |     |            |    |     |        |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
